

Prophylactic **TRE**atment **O**f the du**C**tus **A**rteriosus in **P**reterm infants by **A**cetaminophen

Dear investigators, dear all,

We reached **452 / 794** inclusions at the end of February with **34** inclusions for this month !

Thank you all for your work !

TREOCAPA'S LATEST NEWS :

1. The mid-term Interim Analysis

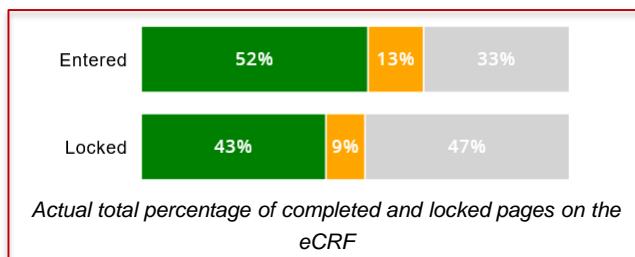

The interim analysis is planned at half of the inclusions. The result of this futility/efficacy analysis could be :

- to **stop the trial** for efficacy/futility
- **or to continue** the trial → more data needed

The 397th patient has been included in January; the interim analysis will therefore be for soon :

Please remember to :

1. Fill in every patients' files included in this analysis
2. Lock every filled pages
3. Continuously answer to the queries put by our Data Managers and during the monitoring visits.

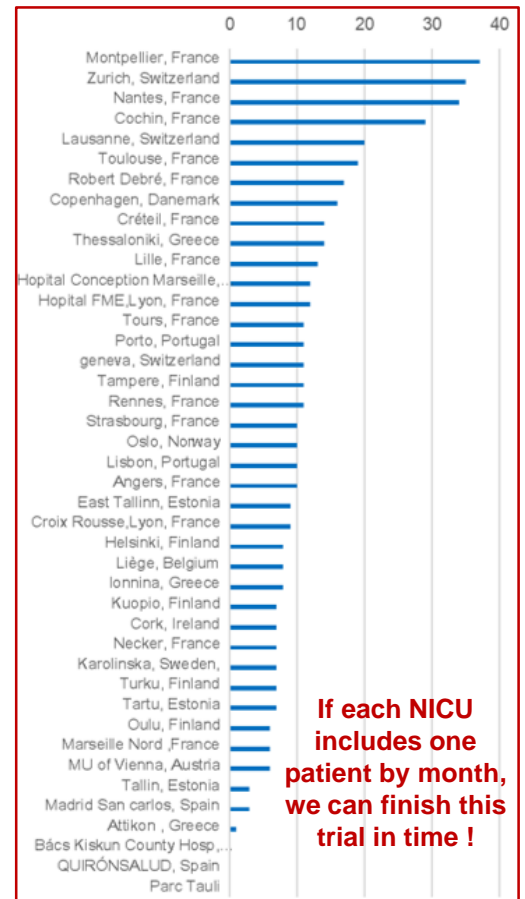

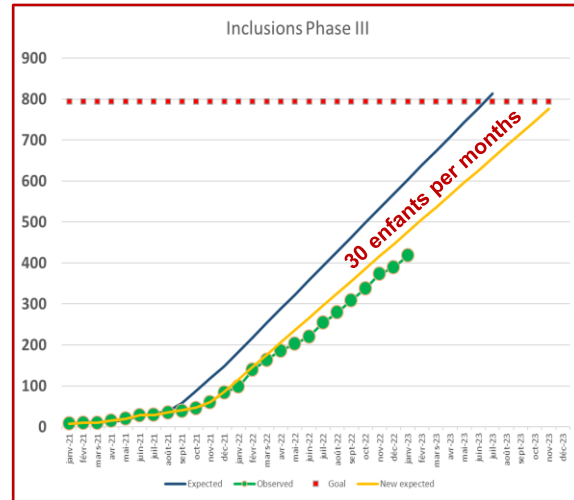

2. Meeting with sites in difficulties

The coordination has begun to schedule meetings with sites in difficulty of inclusions with the aim of finding solutions together. Few days after the meeting, one of these sites included 5 patients, which is a great success ! More meetings will be planned soon.

3. Changes on the SmPC

The investigator teams received the new reference document for paracetamol and placebo, and a summary of the changes.

TREOCAPA is a study co-developed with parents and their European representatives.
